INFORMATION OTHER THAN THE FINANCIAL STATEMENTS AND AUDITOR'S REPORT THEREON

Management is responsible for the other information. The other information comprises the information included in the annual report, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

RESPONSIBILITIES OF MANAGEMENT AND BOARD OF DIRECTORS FOR THE FINANCIAL STATEMENTS

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting and reporting standards as applicable in Pakistan and the requirements of the Companies Act, 2017 (XIX of 2017) and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of directors are responsible for overseeing the Company's financial reporting process.

AUDITOR'S RESPONSIBILITIES FOR AUDIT OF THE FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs as applicable in Pakistan will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit accordance with ISAs as applicable in Pakistan, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the board of directors regarding, among other

matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the board of directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

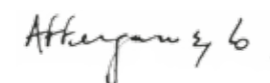

From the matters communicated with the board of directors, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

REPORT ON OTHER LEGAL AND REGULATORY REQUIREMENTS

Based on our audit, we further report that in our opinion:

- a) proper books of account have been kept by the Company as required by the Companies Act, 2017 (XIX of 2017);
- b) the statement of financial position, the statement of profit or loss, the statement of comprehensive income, the statement of changes in equity and the statement of cash flows together with the notes thereon have been drawn up in conformity with the Companies Act, 2017 (XIX of 2017) and are in agreement with the books of account and returns;

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

2.1 BASIS OF PREPARATION

2.1.1 STATEMENT OF COMPLIANCE

These financial statements have been prepared in accordance with the accounting and reporting standards as applicable in Pakistan. The accounting and reporting standards applicable in Pakistan comprise of:

- International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB) as notified under the Companies Act, 2017; and
- provisions of and directives issued under the Companies Act, 2017.

Where provisions of and directives issued under the Companies Act, 2017 differ from the IFRS, the provisions of and directives issued under the Companies Act, 2017 have been followed.

2.1.2 CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

The preparation of financial statements in conformity with approved accounting standards requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Company's accounting policies.

The matter involving a higher degree of judgement or complexity, or area where assumptions and estimates are significant to the financial statements is income tax.

Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

There have been no critical judgements made by the Company's management in applying the accounting policies that would have significant effect on the amounts recognised in the financial statements except the following:

- valuation of long term investments held at fair value through OCI.
- deferred taxation.
- recognition of bonus shares received under investments.

2.1.3 CHANGES IN ACCOUNTING STANDARDS, INTERPRETATIONS AND PRONOUNCEMENTS

a) Standards, interpretations and amendments to published approved accounting standards that are effective and relevant

IFRS 9 'Financial instruments' - This standard replaces the guidance in IAS 39. It includes requirements on the classification and measurement of financial assets and liabilities; it also includes an expected credit loss model that replaces the current incurred loss impairment model.

IFRS 15 'Revenue from contracts with customers' - IFRS 15 replaces the previous revenue standards: IAS 18 Revenue, IAS 11 Construction Contracts, and the related interpretations on revenue recognition.

IFRS 15 introduces a single five-step model for revenue recognition and establishes a comprehensive framework for recognition of revenue from contracts with customers based on a core principle that an entity should recognise revenue representing the transfer of promised goods or services to customers at an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services.

The impact of changes laid down by these standards are detailed in note 3 and 4.

The Securities and Exchange Commission of Pakistan (SECP) through its notification dated July 29, 2019 brought certain alterations in fifth schedule to the Companies Act 2017 (the Act) with regards to the preparation and presentation of financial statements. These alterations resulted in elimination of certain disclosures in the financial statements of the Company as at June 30, 2019.

b) Standards, interpretations and amendments to published approved accounting standards that are effective but not relevant

The new standards, amendments and interpretations that are mandatory for accounting periods beginning on or after July 1, 2018 are considered not to be relevant to the Company's financial statements and hence have not been detailed here.

c) Standards, interpretations and amendments to published approved accounting standards that are not yet effective but relevant

The following is the new standard, that will be effective for the periods beginning on or after January 1, 2019 that may have an impact on the financial statements of the Company:

IFRS 16 'Leases' - IFRS 16 replaces the previous lease standard: IAS 17 Leases. It will result in almost all leases being recognised on the statement of financial position, as the distinction between operating and finance leases is removed. Under the new standard, an asset (the right to use the leased item) and a financial liability to pay rentals are recognised. The only exceptions are short term and low value leases.

The management is in the process of assessing the impact of changes laid down by the standard on its financial statements.

2.2 OVERALL VALUATION POLICY

These financial statements have been prepared under the historical cost convention except as disclosed in the accounting policy notes.

2.3 PROPERTY, PLANT AND EQUIPMENT

2.3.1 OWNED ASSETS

These are stated at cost less accumulated depreciation and impairment, if any.

Depreciation on property, plant and equipment is charged to statement of profit or loss applying the straight-line method over the estimated useful lives of related assets. The useful lives of the assets as estimated by the management are as follows:

– Leasehold improvements	10 years
– Plant and machinery	4 to 10 years
– Office equipments	3 to 10 years
– Furniture and fixtures	7 years
– Motor vehicles	5 to 10 years

Depreciation on additions to property, plant and equipment is charged from the month in which property, plant and equipment is put to use. For disposal during the year depreciation is charged up to the end of month preceding the month in which property, plant and equipment is disposed off.

Subsequent costs are included in the assets' carrying amount when it is probable that future economic benefits associated with the item will increase as a result of that expenditure, will flow to the Company and the cost can be measured reliably.

Gains and losses on disposal of fixed assets are included in statement of profit or loss.

Maintenance and normal repairs are charged to statement of profit or loss as and when incurred. Major renewals and improvements are capitalised and the assets so replaced, if any, are retired.

2.3.2 LEASED ASSETS

Lease that transfers substantially all the risks and rewards incidental to ownership of assets are classified as finance lease. Finance lease is capitalised at the inception of the lease term at the lower of fair value of the leased assets and the present value of minimum lease payments. Subsequent to initial recognition, the asset is accounted for in accordance with the accounting policy applicable to similar owned asset. Outstanding obligations under the lease less finance cost allocated to future periods are shown as a liability.

Finance cost under lease agreements are allocated to the periods during the lease term so as to produce a constant periodic rate of finance cost on the remaining balance of principal liability for each period.

Leased assets are depreciated over the shorter of the lease term and their useful lives unless it is reasonably certain that the Company will obtain ownership by the end of the lease term.

2.4 INTANGIBLE ASSETS

These are stated at cost less accumulated amortisation and impairment, if any. Generally, costs associated with maintaining computer software programs are recognised as an expense as incurred. However, costs that are directly associated with identifiable software and have probable economic benefit exceeding one year are recognised as intangible assets. Direct costs include the purchase cost of software and related overhead cost.

Intangible assets are amortised from the point at which the asset is ready for use. Amortisation charge is based on the straight-line method whereby the cost of an intangible asset is written off over its estimated useful life of 4 years.

2.5 INVESTMENTS IN ASSOCIATES

Associates are all entities over which the Company has significant influence but not control. Investment in associates are accounted for using the equity method.

Under the equity method of accounting, investments are initially recognised at cost and adjusted thereafter to recognise the Company's share of post-acquisition profits or losses of the investee in the statement of profit or loss, and the Company's share of movements in statement of comprehensive income of the investee in other comprehensive income. Dividends received or receivable from associates are recognised as a reduction in the carrying amount of the investment.

When the Company's share of losses in an equity-accounted investment equals or exceeds its interest in the entity, including any other unsecured long-term receivables, the Company does not recognise further losses, unless it has incurred obligations or made payments on behalf of the other entity.

The carrying amount of equity-accounted investment is tested for impairment in accordance with the policy described in note below.

6. FINANCIAL INSTRUMENTS - INITIAL RECOGNITION AND SUBSEQUENT MEASUREMENT

Associates are all entities over which the Company has significant influence but not control. Investment in associates are accounted for using the equity method.

a) Initial Recognition

All financial assets and liabilities are initially measured at cost which is the fair value of the consideration given or received. These are subsequently measured at fair value, amortised cost or cost as the case may be.

b) Classification of financial assets

The Company classifies its financial instruments in the following categories:

- at fair value through profit or loss ("FVTPL"),
- at fair value through other comprehensive income ("FVTOCI"), or
- at amortised cost.

The Company determines the classification of financial assets at initial recognition. The classification of instruments (other than equity instruments) is driven by the Company's business model for managing the financial assets and their contractual cash flow characteristics.

Financial assets that meet the following conditions are subsequently measured at amortised cost:

- the financial asset is held within a business model whose objective is to hold financial asset in order to collect contractual cash flows; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets that meet the following conditions are subsequently measured at FVTOCI:

- the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling the financial asset; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

By default, all other financial assets are subsequently measured at FVTPL.

c) Classification of financial liabilities

The Company classifies its financial liabilities in the following categories:

- at fair value through profit or loss ("FVTPL"), or

- at amortised cost.

Financial liabilities are measured at amortised cost, unless they are required to be measured at FVTPL (such as instruments held for trading or derivatives) or the Company has opted to measure them at FVTPL.

d) Subsequent measurement

I) Financial assets at FVTOCI

Elected investments in equity instruments at FVTOCI are initially recognized at fair value plus transaction costs. Subsequently, these are measured at fair value, with gains or losses arising from changes in fair value recognised in other comprehensive income.

II) Financial assets and liabilities at amortised cost

Financial assets and liabilities at amortised cost are initially recognised at fair value, and subsequently carried at amortised cost, and in the case of financial assets, less any impairment.

III) Financial assets and liabilities at FVTPL

Financial assets and liabilities carried at FVTPL are initially recorded at fair value and transaction costs are expensed in the statement of profit or loss and other comprehensive income. Realised and unrealised gains and losses arising from changes in the fair value of the financial assets and liabilities held at FVTPL are included in the statement of profit or loss and other comprehensive income in the period in which they arise.

Where management has opted to recognise a financial liability at FVTPL, any changes associated with the Company's own credit risk will be recognized in other comprehensive income. Currently, there are no financial liabilities designated at FVTPL.

e) Impairment of financial asset

The Company recognises lifetime expected credit losses for trade receivables that do not constitute a financing transaction. Expected credit losses (ECLs) are a probability weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between cash flows due to the entity in accordance with the contract and cash flows that the Company expects to receive). Life time ECLs are the ECLs that results from all possible defaults events over the expected life of a financial instrument. For all other financial assets, expected credit losses are measured at an amount equal to 12 months' ECLs i.e. ECLs that result from default event that are possible within 12 months after the reporting date.

f) Derecognition

I) Financial assets

The Company derecognises financial assets only when the contractual rights to cash flows from the financial assets expire or when it transfers the financial assets and substantially all the associated risks and rewards of ownership to another entity. On derecognition of a financial asset measured at amortised cost, the difference between the asset's carrying value and the sum of the consideration received and receivable is recognised in profit or loss. In addition, on derecognition of an investment in a debt instrument classified as FVTOCI, the cumulative gain or loss previously accumulated in the investments revaluation reserve is reclassified to profit or loss. In contrast, on derecognition of an investment in equity instrument which the Company has elected on initial recognition to measure at FVTOCI, the cumulative gain or loss previously accumulated in the investments revaluation reserve is not reclassified to profit or loss, but is transferred to statement of changes in equity.

II) Financial liabilities

The Company derecognises financial liabilities only when its obligations under the financial liabilities are discharged, cancelled or expired. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable, including any non-cash assets transferred or liabilities assumed, is recognised in the statement of profit or loss and other comprehensive income.

g) **Financial assets and liabilities - policy upto June 30, 2018**

All financial assets and financial liabilities were initially measured at cost, which was the fair value of the consideration given and received respectively. These financial assets and liabilities were subsequently measured at fair value, amortised cost or cost, as the case may be.

2.7 OFF-SETTING OF FINANCIAL ASSETS AND LIABILITIES

Financial assets and liabilities are off-set and the net amount is reported in the statement of financial position if the Company has a legal right to set off the transaction and also intends either to settle on a net basis or to realise the asset and settle the liability simultaneously.

2.8 TRADE AND OTHER RECEIVABLES

Trade and other receivables are recognised at fair value of consideration receivable. Debts considered irrecoverable are written off and provision is made against those considered doubtful of recovery.

2.9 LOANS, DEPOSITS AND OTHER DEBTS

These are initially measured at cost which is the fair value of the consideration given and are subsequently measured at amortised cost.

2.10 INVENTORIES

Inventories are valued at lower of cost, determined on first-in first-out basis, and net realisable value. Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale. Cost of work in process and finished goods comprise direct materials, direct labour and an appropriate proportion of variable and fixed overhead expenditure.

Stock-in-transit is valued at cost accumulated to the reporting date. Provision is made for slow moving and obsolete items based on management's judgement.

2.11 CASH AND CASH EQUIVALENTS

Cash and cash equivalents are carried in the statement of financial position at amortised cost. For the purposes of statement of cash flows, cash and cash equivalents comprise cash-in-hand, cheques, demand drafts in hand, running finance under mark up arrangements and balances with banks on current and deposit accounts with maturity of less than 90 days.

2.12 IMPAIRMENT OF NON-FINANCIAL ASSETS

Assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets (cash-generating units).

An impairment loss is reversed if there is a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the assets' carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

2.13 TAXATION

i) **Current**

The charge for current tax is based on the taxable income for the year, determined in accordance with the prevailing law for taxation on income, using prevailing tax rates after taking into account tax credits and rebates available, if any.

ii) **Deferred**

Deferred tax is accounted for using the statement of financial position liability method on all temporary differences arising between tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred tax liability is

generally recognised for all taxable temporary differences and deferred tax asset is recognised to the extent that it is probable that taxable profits will be available against which the deductible temporary differences, unused tax losses and tax credits can be utilised.

Deferred tax is determined using tax rates and prevailing laws for taxation on income that have been enacted or substantively enacted by the reporting date and are expected to apply when the related deferred tax asset is realised or the deferred tax liability is settled.

2.14 STAFF RETIREMENT BENEFITS

The Company operates an approved contributory provident fund scheme for all eligible employees who have completed the minimum qualifying period of service. Equal monthly contributions are made, both by the Company and the employees, to the fund at the rate of 10% of basic salary.

2.15 TRADE AND OTHER PAYABLES

Trade and other payables are recognised initially at fair value and subsequently measured at amortised cost.

2.16 PROVISIONS

Provisions are recognised in the statement of financial position when the Company has a legal or constructive obligation as a result of past events, it is probable that an outflow of economic benefits will be required to settle the obligation and a reliable estimate of the amount can be made. However, provisions are reviewed at each reporting date and adjusted to reflect current best estimate.

2.17 FOREIGN CURRENCIES

Transactions in foreign currencies are recorded in Pak Rupee at the rates of exchange approximating those prevailing at the date of transaction. Monetary assets and liabilities in foreign currencies are translated into Pak Rupee using the exchange rates approximating those prevailing at the reporting date. Exchange differences are included in statement of profit or loss.

The financial statements are presented in Pak Rupee, which is the Company's functional and presentation currency and figures are rounded off to the nearest thousand of Pak Rupee.

2.18 REVENUE RECOGNITION

Revenue is recognised when control of the goods is transferred, being when the goods are delivered to the customer and there is no unfulfilled obligation that could affect the customer's acceptance of the goods.

Revenue is recognised on dispatch of goods to customers i.e. when the significant risks and rewards of ownership have been transferred to the customer.

No element of financing is present as the sales are made with a credit term of upto 365 days, which is consistent with the market practice.

2.19 BORROWING COSTS

Borrowing costs are recognised as an expense in the period in which these are incurred except to the extent of borrowing costs that are directly attributable to the acquisition, construction or production of the qualifying asset, if any, are capitalised as part of the cost of that asset.

2.20 DIVIDEND DISTRIBUTION

Dividend distribution to the Company's shareholders is recognised as liability in the financial statements in the period in which the dividend is approved.

2.21 METHOD OF PREPARATION OF STATEMENT OF CASH FLOWS

Method of preparation of statement of cash flows

3. CHANGES IN ACCOUNTING POLICIES - IFRS 9

IFRS 9 replaces the provisions of IAS 39 that relate to the recognition, classification and measurement of financial assets and financial liabilities, derecognition of financial instruments, impairment of financial assets and hedge accounting. The adoption of IFRS 9 Financial Instruments from 01 July 2018 resulted in changes in accounting policies and adjustments to the amounts recognised in the financial statements. The new accounting policies are set out in note 3.6 above. In accordance with the transitional provisions in IFRS 9, comparative figures have not been restated and any adjustment to carrying amount of financial assets and liabilities were recognised in the opening retained earnings as of the transition date.

Classifications and remeasurement

On July 1, 2018 (the date of initial application of IFRS 9), the Company's management has assessed which business models apply to the financial assets held by the Company and has classified its financial instruments into the appropriate IFRS 9 categories. The main effects resulting from this reclassifications and adjustments are as follows:

Financial assets - July 1, 2018		Carrying amount as reported under IFRS 9 July 1, 2018	Reclassification due to IFRS - 9	Remeasurement allowance: ECL	Remeasurement of fair value due to IFRS - 9	Carrying amount as reported under IFRS 9 July 1, 2018

	Loans, advances, prepayments and deposits	8,921	-	-	-	8,921
	Cash and bank balances	13,076	-	-	-	13,076

The impact of these changes on the Company's statement of changes in equity is as follows:

a) IFRS 9 replaces the 'incurred loss' model in IAS 39 with an 'expected credit loss' (ECL) model. The Company has determined that the application of IFRS 9's impairment requirement at July 1, 2018 results in no additional allowance for trade receivables.

4. CHANGES IN ACCOUNTING POLICIES - IFRS 15

The Company has adopted IFRS 15 - Revenue from Contracts with Customers from July 1, 2018. IFRS 15 replaced IAS 18 - Revenue, IAS 11 - Construction Contracts and the related interpretations. According to IFRS 15, revenue is recognized, when control of goods or services has been transferred to the customers, in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. IFRS 15 establishes a five step model that will apply to revenue earned from a contract with a customer. IFRS 15 allows for two methods of adoption:

- retrospectively to each prior period presented with or without practical expedients, or
- retrospectively with cumulative effect of adoption as an adjustment to opening retained earnings in the period of adoption.

The Company has evaluated the impact of the new revenue standard and has concluded that there is no significant adjustment that needs to be given effect in the financial statements.

ii) CREDIT RISK

Credit risk represents the accounting loss that would be recognised at the reporting date if counterparties failed to perform as contracted. Out of the total financial assets of Rs. 1,297 million (2018: Rs. 282 million) the financial assets exposed to the credit risk amount to Rs. 1,297 million (2018: Rs. 282 million) which mainly comprise of long-term investments.

The Company attempts to control credit risk associated with the carrying amount of its receivables by monitoring credit sales limits and securing credits through bank and personal guarantees.

The cash and bank balances represent low credit risk as major balances are placed with banks having credit ratings of A or above as assigned by credit rating agencies.

Loans to employees are not exposed to any material credit risk as these are secured against the employees retirement benefits.

The management does not expect any losses from non-performance by these counterparties.

iii) LIQUIDITY RISK

Liquidity risk reflects the Company's inability in raising funds to meet commitments. The Company manages liquidity risk by maintaining sufficient cash and bank balances and the availability of financing through banking arrangements. Management monitors rolling forecast of the Company's liquidity reserve which comprises of undrawn borrowing facility and cash and cash equivalents on the basis of expected cash flow.

iv) MARKET RISK

a) Foreign exchange risk

Foreign currency risk arises mainly where payables and receivables exist due to transactions in foreign currencies. The Company's exposure to exchange risk comprises mainly due to accounts payable in foreign currency. At June 30, 2019, trade and other payables of Rs. 131.70 million (2018: Rs. 86.20 million) are exposed to foreign currency risk.

As at June 30, 2019, if the Pak Rupee had weakened / strengthened by 9% against US Dollar with all other variables held constant, profit before income tax for the year would have been lower / higher by Rs. 5.74 million (2018: Rs. 3.85 million), mainly as a result of foreign exchange losses / gains on translation of US Dollar denominated trade and other payables.

b) Interest rate risk

Interest rate risk is the risk that the value of a financial instrument will fluctuate due to changes in the market interest rates. As at June 30, 2019, the Company is not materially exposed to interest rate risk.

c) Other price risk

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or by factors affecting all similar financial instruments traded in the market.

The Company's exposure to equity securities price risk arises from investment held by the Company in IBL Healthcare Limited and International Brands Limited and classified in the statement of financial position as fair value through OCI (2018: available-for-sale). The maximum exposure to price risk as at June 30, 2019 amounts to Rs. 40.71 million and Rs. 1,162 million (2018: Rs. 9749 million and Rs. 0.84 million) respectively.

As at June 30, 2019, if the market prices of the equity securities had increased / decreased by 1% with all other variables held constant, other comprehensive income for the year would have been higher / lower by Rs. 12.03 million (2018: Rs. 1.81 million).

v) FAIR VALUES OF THE FINANCIAL INSTRUMENTS

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction in the principal (or most advantageous) market at the measurement date under current market conditions (i.e. an exit price) regardless of whether that price is directly observable or estimated using another valuation technique.

As at June 30, 2019, all financial assets and financial liabilities are carried at amortised cost except for investments in IBL HealthCare Limited and International Brands Limited which are being carried at fair value.

The Company classifies fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1).
- Inputs (other than quoted prices included within level 1) that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (level 2).
- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (level 3).

The Company recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the transfer has occurred.

The Company's policy for determining when transfers between levels in the hierarchy have occurred includes monitoring of the following factors:

- changes in market and trading activity (eg. significant increases / decreases in activity); and
- changes in inputs used in valuation techniques (eg. inputs becoming / ceasing to be observable in the market).

There were no transfers between level 1, 2 or 3 of the fair value hierarchy during the year.

The valuation technique used is as follows:

Level 1: Quoted prices (unadjusted) in active markets

The fair value of financial instruments traded in active markets (such as publicly traded derivatives, and equity securities) is based on quoted market prices at the end of the reporting period. The quoted market price used for financial assets held by the group is the current bid price. These instruments are included in level 1.

Level 2: Inputs that are observable either directly or indirectly

The fair value of financial instruments that are not traded in an active market (for example, over-the-counter derivatives) is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity-specific estimates.

Level 3: Unobservable inputs

If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3. This is the case for unlisted equity securities.

The following table analysis within the fair value hierarchy of the Company's financial assets (by class) measured at fair value at June 30, 2019:

واقع ہوا۔

آمدنی فی حصص
